

**Best placed currently**

ICICI Bank is in the one of the best phase currently wherein not only its balance-sheet has strengthen but also moving from corporate to retail driven bank has brought desired sustainability in its profits. We expect PAT to grow by 21% CAGR during FY22-24e and ROA/ROE would escalate to 2%/16.6% in FY24e from 1.8%/14.7% i0n FY22. NII growth is likely to be very strong (CAGR growth of 23% FY22-24e) led by healthy asset growth coupled with margin expansion

On the asset quality side, we do not see any negative surprises (gross NPAs estimated to be at 3.4% in FY23e vs. 3.9% in FY22). Positively, the bank holds contingent provisions Rs74.5 bn as at FY22.

ICICI Bank is one of our top bet in banking space. We retain BUY rating on the stock with revised TP of Rs1012 (upside of 31% from current levels); valuing parent bank at Rs853 (assigning a multiple of 2.8x on FY24e ABV), life insurance at Rs62, general insurance at Rs52, asset management business at Rs42, securities business at Rs25 and home finance business at Rs2 and overseas subsidiaries at Rs3.

## Investment Rationale

### ➤ The bank has come a long way in diversification its balance-sheet

Transformation of the bank from corporate & international loans dominated one to retail driven has been exemplary. In addition to this, there has been gradual improvement in its liability franchise and also cleaning up its balance-sheet has been well recognized by the investors.

Retail assets have grown at 17% CAGR in last 11 yrs (FY11-22) and has contributed 58% of the incremental total asset growth. For the same period, domestic corporate loans grew at slower pace at 13% CAGR while overseas book de-grew by 3%. Resultant, share of retail loans has increased from 39% in FY11 to 53% in FY22, while at the same time, overseas book share has fallen from 25.5% to 4.8% for the same period. Balance-sheet of the bank has become more granular, diversified and stable now as compared to corporate heavy balance sheet previously that used to bring seasonality & volatility in the earnings of the bank. Positively, share of home loans has increased from 25% in FY11 to 34% in FY22 – which is long gestation product with lower defaults. Adding to this, since cost of deposits of the bank has fallen to <4% (one of the lowest in the industry), bank can add better rated corporates in its portfolio without sacrificing on the margins. Expected revival in the corporate credit demand will also be fruitful for the bank, since it has hand-on experience in project financing.

**We expect strong asset growth to continue**

Loan growth of the bank would be ahead of the industry growth; which is expected to grow by 17.2% CAGR over FY22-24e and retail asset growth is estimated to be higher at 18.9% for the same period. For corporate loans, we expect 12% CAGR growth and SME at 25% CAGR.

**Loans are expected to grow at healthy rates.**

Source: Company, Dalal & Broach Research

### ➤ Margin expansion will drive the NII growth

Unlike lower interest rate cycle for the past 3-4 years, Indian economy is headed for higher interest rate cycle which will lead to margin expansion for the banks going forward. The bank has already witnessed surge in the margins for the past 3-4 yrs which was led by lower cost of deposits.

Going forward, we estimate margins to go up to 4.2% in FY23e from 3.9% in FY22 driven by 1) higher yields – out of the total loan portfolio, 30% of the loans are fixed priced loans, 41% are repo rate linked loans (which gets repriced each quarter), 22% are MCLR linked loans (where the reset happens every 6 mnths / 1 yr) and balance 8% of the loan book is earlier benchmark rated loans. The bank has raised its MCLR by >50 bps and EBLR also by ~50 bps post 90 bps repo rate hike done by RBI. More than 50-60% of loans are likely to get repriced at higher rates 2) slower repricing of liabilities than assets – card rates of retail term deposits has increased by 15-20 bps. Higher share of CASA deposits at 49% shall be helpful for the bank in rising interest rate scenario. In addition to this, RBI has hiked CRR by 50 bps to 4.5% which has sucked out the excess liquidity in the system.

On the whole, higher loan growth coupled with margin expansion, NII growth is likely to be strong at 23% CAGR over FY22-24e vs. 19% CAGR FY20-22 period.

**NII growth is likely to be strong led by margin expansion and healthy asset growth**

Source: Company, Dalal & Broach Research

### ➤ Bank has built strong liability franchise

Robust liability franchise, which takes long years to build, is key to banking business. In our opinion, ICICI Bank has gained considerable size in deposit base with improving CASA profile. Demand and savings deposits have grown by 16% CAGR during FY16-22 and its share in total deposits stands at higher levels of 49% of total deposits. Term deposit growth has been also healthy at 17.6% CAGR for the same period. Branch expansion, brand of the bank, better digital offerings has played meaningful role in building strong deposit base. Benefitted by lower interest rate environment, avg. cost of these deposits is low currently at 3% (FY22). CASA deposit share of bank is also at one of highest among peers bank at 49% (FY22), 48% for HDFC Bank, 45% for Axis Bank.

#### CASA deposits share is witnessing improving trend

Source: Company, Dalal & Broach Research

#### ICICI Bank has one of the best CASA ratio among the large peer banks

Source: Company, Dalal & Broach Research

### ➤ Asset quality outlook looking better

Management has diligently cleaned up the legacy retail NPLs, improved the underwriting of the process of the loans and built more granular retail asset portfolio. Higher cumulative write-offs (Rs8.5 bn during FY17-22), lower delinquencies and greater upgradations & recoveries (Rs517 bn) has helped gross NPAs to come off from peak of 9.1% in FY17 and 10.8% in FY18 to 3.9% in FY22. On the retail portfolio side, the bank uses proprietary & data analytics in addition to bureau checks which has helped it to keep check on asset quality risks. Also, in the business banking and SME business, the bank does parameterized and programme based lending, granularity, collateral and robust monitoring which again helps it to contain risks.

Management expects provisioning cost to operating profit should not exceed 25% for the fiscal FY23. Gross NPLs is expected to come down to 3.4% in FY23e from 3.95% in FY22 while provisioning will remain above 75% levels. In addition to this, the bank holds contingent provisions Rs74.5 bn as at FY22 which can cushion the profits in uncertain scenario.

#### Asset quality has improved remarkably over last 4-5 years

---

➤ **Strengthening of digital capabilities has aided business growth**

ICICI Bank has enhanced its digital offerings which has enabled it to garner sizeable volumes of the business. The ICICI STACK, API banking platform, iMobile app, InstaBiz (universal app for small business), BizPay 360 (Bulk Payment Solution) etc. – these offerings has led to significant growth in digital sourcing and transactions for the bank. Recently, the bank made InstaBiz app interoperable for merchants, implying its non-asset customer can also take benefits of the app. Number of transaction done via UPI iMobile Pay has registered 3.2x increase on yoy basis in FY22. There was 3x increase in number of accounts opened digitally, 2.9x growth in API volume, 2.4x growth in corporate integrations, 2x growth in supply chain counterparties. In addition to this, 50% of personal loans are digitally sourced, 67% of credit cards, 37% of term life insurance policies is sold online.

## Valuations

### Retain BUY with revised TP of Rs1012, upside of 31% from current levels

In our view, ICICI Bank is in one of the best position currently – strong balance-sheet alongwith solid PAT levers viz. margin expansion + healthy asset growth. Also, the bank being one of the large private sector banks has ability to ride on corporate credit demand revival. On the asset quality side, we do not see any negative surprises (gross NPAs estimated to be at 3.4% in FY23e vs. 3.9% in FY22). In addition to this, the bank holds contingent provisions Rs74.5 bn as at FY22 which can cushion the profits in uncertain scenario.

On the whole, PAT is estimated to grow by 21% CAGR during FY22-24e. On the return ratio side, ROA (calculated) would grow to 2% in FY24e from 1.8% in FY22 and ROE to 16.6% from 14.7% for the same period.

We retain BUY rating on the stock with revised TP of Rs1012; valuing parent bank at Rs853 (assigning a multiple of 2.8x on FY24e ABV), life insurance at Rs62, general insurance at Rs52, asset management business at Rs42, securities business at Rs25 and home finance business at Rs2 and overseas subsidiaries at Rs3.

Source: Company, Dalal & Broach Research

ICICI Bank, having one of the lowest deposit cost currently, has become competitive in taking good sizeable share in both retail & corporate loans without much sacrificing on the margins side. For e.g. its MCLR currently at 7.5% /7.75% is similar to HDFC Bank rates of 7.5%/8.05%. In Q2FY23 call, HDFC Bank highlighted that its choosing to not to increase the lending rates much in order to retain market share, implying in large corporate segment, competition has escalated wherein ICICI Bank has also become one of the competitors. Going forward, for ICICI Bank, in our view, there would be EPS growth + valuation appreciation.
