Definitions and Calculation Methodologies

NSE Indices strives to be in alignment with the best practices in the industry and maintain consistency and transparency in the methodology and definitions used. Below are the definitions of metrics used in this report.

Individual scheme quarterly returns are calculated using the aggregate share class NAVs. For schemes that have multiple share classes and have not submitted aggregated NAV series, an aggregate NAV series is derived using weighted average quarterly returns of the individual share classes, weights being the opening share class AUMs.

Asset-weighted Index

An asset-weighted index is created at the category level based on quarterly returns of constituent schemes using relevant AUMs as weights.

Equal-weighted Index

An equal-weighted index is created at the category level based on the quarterly returns of constituent schemes by assigning equal weightage to each scheme.

Sub-Category Definitions

For classification of schemes into various sub-categories, actual asset allocation has been considered. For schemes that are active as on Sep 30, 2022, portfolio composition as on Sep 30, 2022, has been considered. For schemes that have matured, their last available portfolio compositions have been considered.

Category III

Multi Asset: Following schemes have been included under this sub-category –

- Schemes that had/have exposure to commodity or currency derivatives,
- Schemes that have more than 10% exposure to equity and at least some exposure to debt,
- Schemes that have more than 10% exposure to debt and at least some exposure to equity,

Long Short – Equity Fund: Schemes not classified as Multi Asset as per above rule and having/had any short position in equity or index derivatives.

Long only – Equity Fund: Schemes having more than

- 95% exposure to equity, cash and cash equivalents and mutual fund units, And,
- No short position in equity or index derivatives.

For following schemes, categorization has been done based on self-classification and investment objectives/strategies submitted:

- Schemes that did not submit sub categorization data
- Schemes that did not fit any of the above defined criteria
- Schemes that have matured and had > 90% exposure to Cash and Cash Equivalents as on their last submitted portfolio composition dates.

Schemes that still could not be categorized into any of the defined sub-categories have been excluded from sub-category indices and are covered as part of category level aggregate indices.

Note: To ensure consistency of sub-category classifications, a reclassification tolerance band of 5% (above and below the set sub-classification criteria) has been set with effect from the current period. This is to ensure that minor exposure deviations to a certain asset class does not result in frequent sub-category classification changes

Eligibility Criteria

All AIFs registered with SEBI under the SEBI (Alternative Investment Funds) Regulations, 2012, are considered for the calculation of benchmarks, provided they fulfil the following criteria:

1. Completion of one year from the first close of the scheme as on the date for which the benchmarks are calculated. For e.g., the AIF benchmark calculated for the period ending Sep 30, 2022, will have schemes that had their first close on or before Sep 30, 2021
2. Valid data is provided to NSE Indices Ltd. in the specified format and by the stipulated deadline

The following are **excluded** from calculation of benchmarks:

1. Any scheme that has not completed one year since its first close as on the date for which the benchmarks are calculated, i.e., Sep 30, 2022
2. Fund of funds
3. Angel Funds registered under sub-category VCF under Category I-AIF
4. Any scheme that has not provided complete or valid data or that has not provided data in the required format
5. Schemes having vintage of 2012 or earlier

1 scheme was excluded from the calculation of benchmark metrics as on Sep 30, 2022, due to Submission of incomplete/ inconsistent data.
