- i. Also, the management highlighted that, the company's warehouses and offices have opened up
2. Geographically revenue wise, **in cables and wires west and south contribute 50% to sales** (of which west is major) and in FMEG business west contributes major followed by south east and north.

- Impact on Financial Position of Polycab - Currently as of 9MFY20, Polycab has gross debt of INR 932 mn and is net debt stands at INR (2698) i.e. net debt free. This won't have a large impact on the financials. Post this consolidation there will be no increase in expenses as Polycab already recorded those expenses as subcontracting expenses, on account of service from Ryker.
- Expected completion Period - End of May 2020

Outlook and Valuation:

Polycab is the single largest private player in the organized cables and wires industry having a lion's market share aided by strong distribution network. On account of Covid impact; the company has lost ~30-40 days of sales in FY21, the recovery of which is unlikely in the rest of the year. We believe that this will surely increase pressure on the working capital, however, given the strong balance sheet size and strength, Polycab would be able to make up for the loss in the subsequent year. Also due to covid-19, impact on unorganized sector will be at large which might lead to market share gain going ahead. We also expect Government public expenditure to pick up post lockdown, to support the GDP, which would boost infrastructure and increase demand for cables and wires. At CMP of Rs. 755, on P/E basis the stock is trading at 16.3x FY21e and 12.77x FY22e at an EPS of 46.3 FY21e and 59.1 FY22e. **We assign a 16x FY22e Multiple arriving at a target price of Rs. 945 i.e. upside of Rs. 25%. We maintain a BUY on the stock.**
